

# STMD STMD M50-518-40

Vibration damped turning tool holder - modular

MAQ AB

### Price and dimensions

More technical data on page 2

| Diameter (mm) | Length (mm) | Price USD | Price EUR |
|---------------|-------------|-----------|-----------|
| 50            | 518         | \$ 1,588  | € 1,429   |

### Description:

STMD turning tool holder

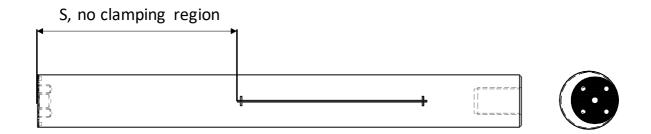

### Supplied with:

Insex screws M6X14, 3 pcs Allen wrench, 1 pcs Coolant adapter G3/4, 1 pcs

#### Note:

Cylindrical shank without clamping feature. With central groove for alignment. Recommended application range up to 9XD. Refer to product performance datasheet bellow.

Maximum cutting depth (To be updated) mm.

| Technical data                         |                          |
|----------------------------------------|--------------------------|
| Adaptive interface machine direction   | 50                       |
| Adaptive interface workpiece direction | SL40                     |
| No clamping region (S)                 | 140 mm                   |
| Maximum overhang (OHX)                 | Approx. 420<br>mm        |
| Coolant entry form                     | Axial concentric         |
| Coolant exit form                      | 1C – axial               |
| Coolant entry thread size              | G 3/4                    |
| Max coolant pressure                   | 70 bar                   |
| Alignment aid property                 | Central groove           |
| Connection diameter (DCON)             | 50 mm                    |
| Functional length (LF)                 | 518 mm                   |
| Body material                          | Steel                    |
| Weight of item                         | 8.0 kg                   |
| Recommended clamping length            | 150 mm (3XD)             |
| Method of cutting off                  | Slot turning /<br>Sawing |

# Quality / Product performance reference\*

Depth of cut: 0.5 mm Nose radius:

Cutter head: MAQ SDUCR 40 Cutting insert: DCMT 11T304

34 CrNiMo, HRC 28-30 Coolant: Workpiece material:

Feed: mm/rev; Speed: m/min; Ra: µm Units:

Quiet with good/medium surface quality

Slight to medium vibrations with medium to bad surface quality

Strong vibrations / Insert broken

### Surface finish (Ra) table

7xD DOC = 0.5mm

| Feed<br>Speed | 0.05** | 0.10 | 0.15 | 0.20 |
|---------------|--------|------|------|------|

| 200           | 0.53   | 0.90 | 2.15 | 3.05 |
| 150           | 0.53   | 1.11 | 2.31 | 3.43 |

<sup>\*</sup> The actual product performance is dependent on the rigidity of the clamping methods, and the table is used as reference

MAQ AB

<sup>\*\*</sup> In actual machining, avoid using depth of cut or feed rate below 0.07mm when working with carbide insert (the edge radius)
