

## STMD I 5/16 - 4.7 SCLCR 06 and STMD I 5/16 - 4.7 STUBR

MAQ simplifies machining by reducing vibration! MAQ's self-tuning mass damper (STMD™) technology is included in all of their anti-vibration tool holders and reduces vibration in a wide range of frequencies. This technology is used for CNC milling, turning and hole making operations. This new technology greatly reduces the unpredictable and frustrating byproducts of machining: vibrations (regenerative tool chatter).

Straight holder (8-12xD) with fixed cutter heads (Inch)
