

The best damped bars in the world deserve the best possible cutter head!

Looking for the perfect cutter head for your damped bars? Look no further! MAQ has you covered with our top-notch cutter head collection.

MAQ has taken the time to develop the most thought-through cutter heads on the market, addressing all your needs and more. With years of expertise, MAQ ensures that their cutter heads hold the insert perfectly and distribute cutting fluid efficiently, giving you the results you expect.

MAQ cutter heads are designed to meet nearly all requirements, offering ISO standard cutter heads with the SL-Serration Lock interface for various applications like longitudinal turning, roughing, profile turning, threading, and more. MAQ has you covered from A to Z!

But wait, MAQ has something unique for you! Introducing their diamond burnishing cutter head, the first of its kind in the world! Get ready to achieve unmatched precision and quality in your machining projects!

MAQ values your feedback and they have incorporated it to ensure our cutter heads meet the highest standards. MAQ cutter heads feature a rigid clamping design, a flat surface for easy alignment, optimal toughness and impact strength, effective cooling, rust resistance, and more! MAQ has left no stone unturned to make your machining experience seamless.

At MAQ, they strive to simplify machining for their customers. That's why they offer a wide range of accessories, including the best cutter heads, at a competitive price. Don't settle for less when you can have the best!
